

Solved Problems - Functions

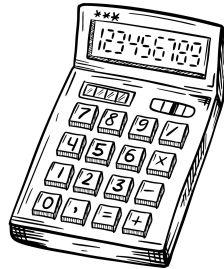

Problem 4

Problem 4

Write a function *related_sum*(n) that given a natural number n returns the sum of digits in the first and in the second half of n . The function must also indicate the order relationship among those quantities. Assume that the input number n has always an even amount of digits.

Problem 4 - Examples

Input:

Output:

78

7 < 8

9787

16 > 15

70724444

16 = 16
